Natural Language Processing (NLP) Class Project Guidelines: --

1) Each team will pick one paper from Google Scholar or any project as a reference to start work with. Note that the topic can be from any domain, but it must use the NLP tasks.

2) The Project Consists of 4 Phases: --
    a. **Phase 1:-- Project proposal:-- [Due Date: 9/21 – 11.59PM] (100 Points) (5% out of 45%)**
        I. Two – three-page description in a PDF document.
        II. Check the project proposal guideline document attached in the D2L module for clear expectations.

Note: After submitting your phase-1, I will approve your selected topic. Please wait for my confirmation on your project topic before starting the next phase.

    b. **Phase 2:- Project milestone:-- [Due Date: 10/26 – 11.59PM] (100 Points) (10% out of 45%)**

        I. A three to four-page description of Data pre-processing steps and discuss the early findings, and submit it in PDF format.
        II. Check the project milestone guideline document attached in the D2L module for clear expectations.

    c. **Phase 3:-- Final Presentation (Upload the final Presentation slides):-- [Due Date: 11/23 – 1.00 PM] (100 points) (15% out of 45%)**
        I. Required to submit the presentation slides and present on the scheduled date, which is Nov 23rd.
        II. Check the project Presentation guideline document attached in the D2L module for clear expectations.

    d. **Phase 4:-- Final Report:-- [Due Date: 11/30 – 11.59 PM] (100 points) (15% out of 45%)**
        I. A refined version of the project milestone report in IEEE report format, and submit it in PDF format.
        II. Check the project report guideline document attached in the D2L module for clear expectations.

Grade Points: -- (All points for all the phases are distributed among a total of 45%).
